New wiring aft curbside above the bed area for 1 of 2 new reading lights. 1/2" & 3/4" grommets were used throughout where the wiring penetrated the skin - something Airstream failed to use. Wiring for the the under cabinet galley light- this is the same area as seen in the top left image in this section.

Electrical Wiring - Vintage Airstream

Otherwise, assuming that the RV is equipped with an inverter, 12 Volts of DC power will be pulled from the house batteries. That power will run through the RV's inverter, and the produced 120 Volts of AC power will run whatever you connected to the power outlets: microwave, phone charger, laptop, TV, etc.

RV Electrical Diagram (Wiring Schematic) - Camper Guide

Lithium Batteries. In an RV, there are 3 typical types of batteries used: Open Cell Lead-Acid Batteries are the cheapest, and our Airstream came with a single open cell battery with approx. 40 amp-hour of usable capacity. The advantage of these batteries is that they are cheap, and the disadvantages are everything else:

What's the Deal with the Battery ... - RV Repair Club

One RV. Two Electrical Systems. Your RV has two separate electrical systems: a 12-volt DC electrical system and a 120-volt AC system. The 12-volt system is powered by a battery (or in some cases, multiple batteries), and it powers things such as the start-up on your water heater, furnace, and refrigerator, plus most of the lights in your RV's living space, your water pump, your carbon ...
