Troubleshooting Guide

The standard High Flow TMtherapy set up for AIRVO 2 has two wall flow meters (0-15 and 0-70 Litres/min maximal flow). Dependent on the required FIO2 and the flow rate specific for the patient, the wall flow meter that allows for greater flow rates up to 70 Litres/min must be used to achieve the desired FIO2. See table below: Flow rate child

AIRVO™ | Fisher & Paykel

If you look at one of the capacitors 47uF/50V, is a bit discolored compared to the one beside it. Those 2 capacitors are the filters for the rectified voltage input to the regulator circuit (series pass transistor regulator configuration). What fails is the SM transistor and zener diode. I hope this might help you in the future
