Roots Flashcards | Quizlet

I suggest you read Fractional Exponents first, or this may not make sense.

Anyway, the important idea is that: $x^{1/n}$
= The n-th Root of x. And so a fractional exponent like $4^{3/2}$ is really saying to do a cube (3) and a square root (1/2), in any order. Just remember from fractions that $m/n = m \times (1/n)$:

thought a day of review and practice with fundamental exponent ideas was warranted in the first unit. It's always debatable to me where this should first be introduced, but I think students coming out of 8th grade Common Core mathematics should be able to handle this lesson, which culminates with students multiplying monomials.
