In *At War with the Weather*, Professors Howard Kunreuther and Erwann Michel-Kerjan and their colleagues present leading thinking in a data-driven analysis of the problem society faces in managing the risk of natural disasters. They analyze the dynamics of the market, including the significance of insurer regulation, and propose innovative solutions.

At War with the Weather | The MIT Press

In *At War with the Weather*, Howard Kunreuther and Erwann Michel-Kerjan with their colleagues deliver a groundbreaking analysis of how we currently mitigate, insure against, and finance recovery from natural disasters in the United States. They offer innovative, long-term solutions for reducing losses and providing financial support for disaster victims that define a coherent strategy to assure sustainable recovery from future large-scale disasters.

Directed energy is such a powerful technology it could be used to heat the ionosphere to turn weather into a weapon of war. Imagine using a flood to destroy a city or tornadoes to decimate an approaching army in the desert. The military has spent a huge amount of time on weather modification as a concept for battle environments.

He refers to “weather war,” indicating that the U.S. and the Soviet Union had already: “mastered the know-how needed to unleash sudden climate changes (hurricanes, drought) in the early 1980s.” (3) These technologies make it “possible to trigger atmospheric disturbances by using Extremely Low Frequency (ELF) radar [waves].”

Quotes - Weather Warfare

If a war broke out between the United States and China, the clash between two of the world’s most powerful militaries would be horrific. And the United States could very well lose.
