The idea is that you just need to start from the brake that is farthest from the master cylinder. 4. Assemble your brake bleeder kit so that it looks like the image to the right. 5. Climb under your Jeep and remove the rubber cap attached to your brake bleeder valve/nipple. 6.

Bleeding Your Jeep Brakes - 4x4xplor.com - Jeep TJ ...

I bled the brake system a few times, still the same issue. I replaced the master cylinder using a new one for a 1989 wrangler but that didn't help, so then I tried a master cylinder for a 1986 Comanche/Wagoneer since those are the brakes I have (both models use the same cylinder/have the same part #) and still having the same problem.

capable of being done alone with the proper tools, but it is best to employ the services of an associate. Step 1: With the vehicle secure, and tires removed, start at the farthest wheel from the Master Cylinder. For the standard Left Hand Drive vehicle, the starting point is ...

How To Bleed Brakes | Quadratec

When installing or replacing a master cylinder, it is critical that all air is removed from the master cylinder. This can easily be done by bench bleeding the master cylinder prior to installation. 1) Place your master cylinder in a vise by the mounting ears (not the body). Make sure it is level. 2) Attach a short piece of brake line to each ...
