Bricking refers to a consumer electronic device that has been damaged beyond repair, making it utterly unusable, often because of damaged firmware. The use of the term stems from the brick-like shape of many consumer gadgets, and the fact that once they are rendered inoperative, they are virtually useless except as a paperweight or a doorstop.

What is Bricking? - Definition from Techopedia

In agreement with the first poster to this term, bricking is commonly used in the electronics industry by software developers when updating a piece of hardware with a software update that renders the hardware useless after the update.
