Eigrp Configuration Lab

Answer

Configuration

Configuring EIGRP 2. By default, the network command uses a classful network as the parameter. All interfaces inside that classful network will participate in the EIGRP process. To enable EIGRP only on specific interfaces, a wildcard mask can be used. The syntax of the command is: (router-eigrp)

Answer

EIGRP Configuration Step by Step Guide

EIGRP has been configured on R1 and R2. R2 is directly connected to the subnet 10.0.1.0/24 and advertises that subnet into EIGRP. Let's say that R2's metric to reach that subnet is 28160. When the subnet is advertised to R1, R2
