Symptom: The MARS user guide states that any syslog messages from an ASA device must NOT use the emblem format. The guide goes on to state that the command "logging emblem" and the command "logging host <interface name> <CS-MARS's IP address> format emblem" must not exist in the ASA configuration in order to meet this requirement.

Kotlin, new JVM statically typed language, is getting its first official release. This blog post (1st in the series, hopefully) shows how to use Kotlin on JVM. To make it a bit more interesting, Kotlin will be utilized in an Opendaylight (written solely in Java) application using NETCONF protocol. The application closely follows official Opendaylight netconf sample application with parts of it ...
