### Coffee Roasting Guide

Coffee Roast Guide. Roasting is a heat process that turns coffee into the fragrant, dark brown beans we know and love. Why roast? Roasting brings out the aroma and flavor that is locked inside the green coffee beans. Beans are stored green, a state in which they can be kept without loss of quality or taste. A green bean has none of the characteristics of a roasted bean -- it's soft and spongy to the bite and smells grassy.

### Coffee Roast Guide - National Coffee Association
