Email: DMDC Contact Center Do not send sensitive information via unencrypted email. NOTE: In order to protect Personal Identifiable Information (PII) or other sensitive data, follow the instructions Contact Center Email Encryption for establishing encryption capability with the DMDC Contact Center. Please note that marking the emails containing PII as ‘private,’ does nothing to protect sensitive information, and may actually prevent the Contact Center from receiving the email.

A contact center is very similar to a call center. The key difference between a call center and contact center is the number of features in each solution. A call center is deployed only for voice-based processes, whereas a contact center allows communication through multiple channels such as voice, web, chat, email and social media.
