Documentation¶. Readability is a primary focus for Python developers, in both project and code documentation. Following some simple best practices can save both you and others a lot of time.

Documentation — The Hitchhiker's Guide to Python

7.1. Introduction¶. Python's documentation has long been considered to be good for a free programming language. There are a number of reasons for this, the most important being the early commitment of Python's creator, Guido van Rossum, to providing documentation on the language and its libraries, and the continuing involvement of the user community in providing assistance for creating ...

7. Documenting Python — Python Developer's Guide

The same site also contains distributions of and pointers to many free third party Python modules, programs and tools, and additional documentation. The Python interpreter is easily extended with new functions and data types implemented in C or C++ (or other languages callable from C).

The Python Tutorial — Python 3.8.5 documentation

Documenting your Python code is all centered on docstrings. These are built-in strings that, when configured correctly, can help your users and yourself with your project's documentation. Along with docstrings, Python also has the built-in function help() that prints out the objects docstring to the console. Here's a quick example:

Documenting Python Code: A Complete Guide - Real Python

The Python Language Reference¶ This reference manual describes the syntax and "core semantics" of the language. It is terse, but attempts to be exact and complete. The semantics of non-essential built-in object types and of the built-in functions and modules are described in The Python Standard Library.
