### **Fuel Operated Inline Pressure Control**

3 & 4 inch fuel operated inline pressure control valves that replace the older 64130 and 64140 models. Because they have many characteristics in common, a single manual is used to present both units. The valves listed above are designed to provide a constant nominal pressure at a remote sense point using fuel pressure generated within the system.

### **Amazon.com: high pressure fuel line**

The fuel tank pressure sensor, or fuel rail pressure sensor, detects pressure changes in the evaporative emission system and fuel tank. It is usually mounted on the tank itself, and sends signal to the PCM to help control the engine's fuel usage. This sensor is responsible for reporting EVAP leaks and bad fuel caps using the Check Engine light.
