Immunotherapy versus standard of care in metastatic renal cell carcinoma. A systematic review and meta-analysis
Immunotherapy improved OS compared to SOC in mRCC, irrespective of treatment line. In first-line, immunotherapy also increased the ORR compared to sunitinib.

Immunotherapy versus standard of care in metastatic renal ...

Abstract. Renal cell carcinoma (RCC) evokes an immune response, which occasionally has resulted in spontaneous and dramatic remissions. In an attempt to reproduce or accentuate this response, various immunotherapeutic strategies have been studied. The most consistent antitumor activity has been reported with interferon- α (IFN- α) and interleukin-2 (IL-2).

Retracted: Immunotherapy of metastatic renal cell ...

Localized renal cell carcinoma (RCC) is often curable by surgery alone. However, metastatic RCC is generally incurable. In the 1990s, immunotherapy in the form of cytokines was the mainstay of treatment for metastatic RCC. However, responses were seen in only a minority of highly selected patients with substantial treatment-related toxicities.

Immunotherapy in Metastatic Renal Cell Carcinoma: A ...

Immunotherapy for kidney cancer—also called renal cell cancer—has tremendously changed the treatment landscape and overall survival of patients with metastatic kidney cancer. The kidneys, located on each side of the body toward the back of the abdominal cavity, filter blood, clear waste, and make urine.
