Amazon.com: Customer reviews: The Life of Mammals, Vol. 2

The large flying fox (*Pteropus vampyrus*) is generally reported as the largest bat. Its wingspan has been verified to 1.83 m (6.0 ft) and may possibly reach 2 m (6.6 ft). In weight it is surpassed by the closely related Indian flying fox (*P. giganteus*), which is the heaviest bat at up to 1.6 kg (3.5 lb). A few other relatively poorly known species of flying foxes may match these, but few ...

David Attenborough hosts this look into the animal kingdom. Volume two of this series on mammals examines the carnivores, omnivores, and those in the mammal kingdom with chisel-like front teeth for uprooting deep plants. One of four volumes in this BBC series.

Life of Mammals - Vol. 2 (DVD, 2003) for sale online | eBay

The sirenians, the family of aquatic mammals that includes manatees and dugongs, are distantly related to pinnipeds and share many characteristics. At 13 feet long and 1,300 pounds, the West Indian manatee is the biggest sirenian by an accident of history: A bigger member of this breed, Steller's sea cow, went extinct in the 18th century.

4 USDA Forest Service Gen. Tech. Rep. RMRS-GTR-135-vol. 2. 2005 Influence of Large Mammals Effects of large herbivores (ungulates) on plant community composition and structure have been studied in many grasslands worldwide (Frank and McNaughton 1992). Ungulate activities affect many aspects of grassland structure and function, including

Chapter 1: Wildlife

Determined behavioral audiograms for 3 horses and 2 cows. Horses' hearing ranged from 55 Hz to 33.3 kHz, with a region of best sensitivity from 1 to 16 kHz. Cattle hearing ranged from 23 Hz to 35 kHz, with a well-defined point of best sensitivity at 8 kHz. Of the 2 species, cattle proved to have more acute hearing, with a lowest threshold of -21 db (re 20 μ N/m⁻²) compared with the horses ...

Chemical capture and anaesthesia of free-ranging mammals will always involve some risk of mortality even in healthy animals. Deaths may be directly or indirectly attributable to the anaesthetic event itself (e.g. drug overdose, drowning during induction and dart trauma) or may be caused by secondary effects from the capture (e.g. stress, myopathy, trauma or instrumentation with radio ...
