electron. static electricity. current electricity. the movement of electrons from place to place. a tiny particle in an atom that has a negative charge. the buildup of electrons that can move from place to place sud.... a steady flow of electrons.

electricity and magnetism physical science Flashcards and ...

Electricity and Magnetism Electricity and magnetism are integral to the workings of nearly every gadget, appliance, vehicle, and machine we use. This unit explains electricity, from charged particles at the atomic level to the current that flows in homes and businesses. There are two kinds of electricity: static electricity and electric currents.

Science A-Z Electricity & Magnetism Grades 5-6 Science Unit

Electricity and magnetism. Electricity is the flow of electrical charge. Atoms are made of three different particles, of which some have a positive charge, some have a negative charge, and some have no charge at all. Static Electricity is the imbalance of positive or negative charges between objects. If two objects have opposite charges, they'll pull toward each other.
