Manual:License - MikroTik Wiki

RouterOS bridge interfaces are capable of running Spanning Tree Protocol to ensure a loop-free and redundant topology. For small networks with just 2 bridges STP does not bring much benefits, but for larger networks properly configured STP is very crucial, leaving STP related values to default may result in completely unreachable network in case of a even single bridge failure.

Manual:Interface/Bridge - MikroTik Wiki

RouterOS is the operating system of RouterBOARD. It can also be installed on a PC and will turn it into a router with all the necessary features - routing, firewall, bandwidth management, wireless access point, backhaul link, hotspot gateway, VPN server and more. You can compare the different license Level features on this page in our manual .
