World food problems are as diverse as their solutions. The main causes of these problems are surging population growth, decreasing the amount of land for crops, lack of resources and technology sufficient to deal with food deficit and also poor methods of consumption. The problems partly contribute to starvation, poor physical health and poverty.

World Food Problems - Essays Writers

The global food problem consists of the lack of food provision for the Earth's population. It manifests itself primarily in the poorest countries of the Third World and is currently aggravating as their populations grow. The total number of people suffering from a lack of food is over one billion people worldwide.
