How To Make A Recurve Bow - The Basic Woodworking

These days I exercise better judgement and only shoot at designated archery targets, but my fascination with this ancient technology is as strong as ever. Several years ago I built my own wood and fiberglass recurve bow from a kit. The "recurve" refers to the way the bow curves away from the shooter at the tips.

Build a Recurve Bow | Popular Woodworking Magazine

bow-making could prove dismal and costly. It's one thing to get a slat or stave of lemonwood and whittle out a simple bow that will perform to a fair degree of satisfaction, but the beginner who attempts to make a laminated recurve bow is tackling the most difficult project in the critical field of bow-making.

Tom Jennings of S. & J. Archery checks the weight oi a ...

A recurve bow is a much simpler style of the bow than the more popular compound bow. The term "recurve" comes from the way the bow curves away from the shooter at the ends. This allows the bow to propel the arrow with more power and energy than a traditional straight-limbed bow. This makes the arrow go farther.
