This Is Service Design Thinking

Service design thinking is the designing and marketing of services that improve the customer experience, and the interactions between the service providers and the customers. If you have two coffee shops right next to each other, and each sell the exact same coffee at the exact same price, service design is what makes you walk into one and not the other.

Wherein, Service Design Thinking is about applying design thinking and product and interaction design methods for creating the seamless experience and interface to tangible service touchpoints (for example advertising, in-store, website, mobile app & desktop interfaces) and abolish the distinct silos of customer touchpoints.

Difference between design thinking and service design thinking

Service Design is based on an iterative process that helps to organizations to innovate. Applying service design in an organization or project is not a yes/no decision. Often teams start with using only a few tools or methods in a first project. They learn how to adapt the process and language to their own organizational culture.
